TITLE : RECEIVING EQUIPMENT FOR IMAGE  
INFORMATION

ABSTRACT : PROBLEM TO BE SOLVED: To enable receiving through an easy operation for a user, when receiving plural makers or plural kinds of image-pickup devices by controlling the input of specified input means, when a specifying means specifies the input means.

SOLUTION: As an output means for outputting picked-up image information, a digital camera 11 is provided with a storage medium 12 for storing the image information picked up by the camera 11 and a connector 13 for transmitting the image information as a digital signal. The user specifies the output means for outputting the image information picked up by the digital camera 11 to with respect a receiving to equipment 10 by selecting the kind of digital camera or storage medium to be displayed on a display. Then, the storage medium 12 or the connector 13 of digital camera 11 is connected to a corresponding reader part 14 or a connector part 15 of the receiving equipment 10. By performing only such an operation, the receiving operation of printer is enabled and danger to complicate an operating method can be avoided.
